Hon David Ashford MHK
Legislative Buildings, Finch Road
Douglas IM1 3PW
ISLE OF MAN

Dear ~~Minister Ashford~~ David,

As you would be aware, many people of Mann are concerned about the distribution of COVID-19 vaccine doses on the Isle of Man.

Consequently, I have two questions to ask:

1) Have any COVID-19 vaccine doses which have been delivered to the Isle of Man been disposed of, or otherwise not administered to patients?

2) On 6 January, 2021, during your public COVID-19 briefing, you said that there have been surplus doses in vials[1]. How have these surplus doses been distributed to people? Who was selected for these extra doses, and how?

Thank you in advance for your assistance in answering these two questions. Thank you for your continued service to our shared community.

Yours sincerely,

MICHAEL JOSEM

[1] Public Isle of Man COVID-19 Briefing, 6 January 2021. Ashford: *"One good piece of good news that I can give is that like a lot of places people will have seen these reports where people have said they're getting six doses out of the vials instead of five. That is the case with us as well. So we will be able to do more than we anticipated in in shorter time."*
